PROFESSIONAL STATEMENT

The Story Behind the Work

Content has always been my priority. Over 7+ years, I have grown through every layer of it, from writing to marketing, from SEO to full editorial leadership, and now into AI-integrated content strategy. Each role has sharpened my ability to not just produce content, but to build systems, lead teams, and drive measurable results.

I have worked across industries: fintech, renewable energy, packaging, real estate, e-commerce, and logistics, giving me an unusually broad strategic lens. Whether it's a 2,000-word technical blog, a landing page built for conversion, or a cross-platform brand voice rollout, I approach every brief with editorial precision and strategic intent.
